

WHAT DETERMINES THE QUOTATION OF LASER CUTTING MACHINES?

Posted on 2023-05-06 by redsail

Category: [Laser Cutter News](#)

The price of a machine is mainly determined by its power, and machines with different powers often exhibit different effects when facing different types of metal plates. The laser cutting machine can cut stainless steel, carbon steel, aluminum, and copper with a maximum thickness of mm. Of course, it depends on the brand of the laser cutting machine. The size of the brand determines the price of the equipment.

When choosing laser cutting machines, ensuring the quality of large brands is more trustworthy.
