

# WHAT IS THE LIFESPAN OF A LASER TUBE?

Posted on 2023-04-11 by redsail

Category: [Laser Cutter News](#)

Normally, the lifespan of a laser tube is between 2500 to 4000 hours, depending on the frequency and power used. After 12-18 months of maintenance, there are generally no problems. During use, it is recommended to strictly follow the usage specifications and regularly observe the water cooling condition.
